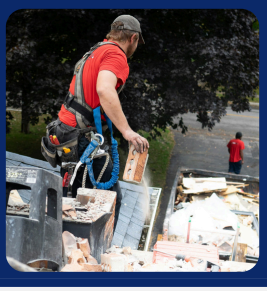
COMPANY OVERVIEW

Pierce & Sons Construction LLC is a North Carolina–based general construction firm providing comprehensive construction services to federal, military, and commercial clients. The company specializes in commercial construction, design/build, renovation, and multi-trade construction support, delivering quality workmanship while meeting project schedules and budget requirements. As an SBA-certified 8(a) participant and HUBZone firm, Pierce & Sons Construction brings added value to government agencies seeking qualified small business partners. The company operates as both a prime contractor and subcontractor and has successfully supported projects for U.S. Army and Department of Defense installations, including Fort Bragg. Pierce & Sons Construction maintains a skilled, on-hand workforce and holds an unlimited contractor's license, allowing the firm to manage a wide range of construction trades under one contract. With a strong commitment to professionalism, accountability, and customer service, the company is focused on delivering reliable, compliant, and on-time construction solutions.



CORE COMPETENCIES

Commercial & Institutional Construction
- Construction services for government, military, and commercial facilities, delivered with a focus on quality, safety, and schedule compliance.

Design/Build Services
- Integrated design and construction solutions that streamline project delivery and reduce administrative burden for agencies.

Facility Renovation & Remodeling
- Interior and exterior renovations to upgrade, modernize, and maintain operational facilities.

Concrete & Structural Construction
- Concrete foundations, structural components, and related construction work supporting new builds and renovations.

Framing, Drywall & Finish Carpentry
- Complete interior build-out services including framing, drywall installation, and finish carpentry.

Electrical, Plumbing & Mechanical Coordination
- Licensed coordination and installation support for electrical, plumbing, and mechanical systems.

Demolition & Site Preparation
- Controlled demolition and site preparation services to support renovation and new construction projects.

DIFFERENTIATORS
